Design Chain Services

Avnet offers engineers a host of services from any point in the design cycle from concept to architectural design to new product introduction and on through next generation modification or end-of-life. Avnet has the technical products, services and tools to accelerate design cycles, including ASIC and programmable logic engineering services, IP cores and more. With offerings that run the gamut from webinars to connector assembly, Avnet offers it all:

Assembly and Value-add

- Custom cable assembly
- Testing services
- Programming services

Design Tools

- Development and evaluation kits
- Design Hub, incl. the AVAIL block diagram app

Engineering Services

- System level design experts
- Design services
- Trained field application engineers

Technical Education

- Seminars/webinars
- Virtual events

Avnet IoTConnect® Solutions Suite

Avnet provides solutions from the edge all the way to the cloud with our extensive products and services. When it comes to the Internet of Things, Avnet's IoTConnect Solutions Suite — including an enterprise IoT and AI platform powered by Amazon Web Services or Microsoft Azure — helps companies simplify the complexity of IoT in order to drive valuable insights, faster. To learn more, visit avnet.com/iot.

Avnet Velocity

Avnet Velocity supports our customers' growing need for supply chain strategies that balance reliability and responsiveness, efficiency and ingenuity. With our state-of-the-art, Mode 2 Supply Chain as a Service (SCaaS) portfolio, Velocity specializes in creating and implementing non-traditional, digitally-enabled supply chain solutions that deliver sustained value to customers and suppliers up and down the supply chain. For more information, visit avnet.com/velocity.

Avnet® Integrated

Avnet Integrated offers comprehensive systems integration, business and service solutions. Collaborating with the industry's premier platform suppliers, Avnet Integrated helps customers optimize capital, accelerate sales and deliver on their brand experience, ultimately accelerating revenue and margin growth. To learn more, visit avnet.com/integrated.

Supply Chain Services

Avnet optimizes supply chains by providing end-to-end supply chain services to electronic original equipment manufacturers (EOEMs), electronic manufacturing services (EMS) providers and electronic component manufacturers. By combining internal competencies of global warehousing and logistics, finance, information technology and asset management with objective, external industrywide data, Avnet's supply chain services allow customers to increase their overall business knowledge, enabling more informed decisions:

Component Intelligence

- Bill of material (BOM) analysis and health risk assessment
- Inventory optimization services
- Green initiative programs

Supply Chain Assessment

- Discovery and logistical analysis
- Financial analysis
- Project implementation

Inventory Management Solution

- MRP/EDI Management
- Vendor-managed inventory
- Consignment, proximity and buffer inventory
- New product introduction (NPI) program support
- End-of-life management

Global Strategic Hub

- Supply Chain as a Service (SCaaS)
- Customer-owned inventory (COI) programs
- Diversity/set aside programs
- Point-of-use replenishment (POUR) programs

Avnet® Embedded

Avnet provides the most comprehensive embedded compute, display and software solutions. Our team collaborates to meet the technical demands for innovation and quality, with a focus of total cost of ownership. Utilizing Avnet's platform technologies, design and our world-class partners, we are able to work with organizations throughout the product lifecycle — from initial product design and prototyping to full scale manufacturing and beyond. Our capabilities enable us to help the world's most diverse OEMs to deliver their leading-edge solutions. For more information, visit avnet.com.
