

## How Sustainable Energy Can Do the World a Power of Good

Sustainable energy refers to energy and technology that can “meet the needs of the present without compromising the ability of future generations to meet their needs.

### Solutions

#### Increasing efficiency and affordability of solar energy

Thanks to developments in photovoltaic technology, solar power is no longer an elusive and expensive source of energy.

[Learn more](#)

#### Meeting irrigation needs with solar power

Many parts of the world do not have access to electricity and rely on diesel generators to extract groundwater for irrigation.

### Sustainable technology Green energy - wind, solar, ESS

Avnet together with the leading suppliers bring you the best Sustainable technology - Green energy products.

**Amphenol**  
Surlok Plus®  
connector

**Belfuse**  
Johnson Waterproof  
RF connectors

**Bourns**  
BMS transformer

**Microchip**  
MCP73223

**Murata**  
SMD Type NTC  
NCU18 & NCU15  
series

**onsemi**  
RSL10-  
SOLARSENS-GEVK

**Rohm**  
4th Generation  
SiC MOSFET

**TDK**  
Power Line Chokes

**Vishay**  
MKP1848C DC-Link  
film capacitor

**Xilinx**  
New energy  
intelligent gateway
