AVNET®

/ END-TO-END SERVICES FOR YOUR TECHNOLOGY

Get the full support you need across the globe with end-to-end services from Avnet Integrated Solutions. You can work with us to manage all your services in one easy package or customize a unique support program to meet the needs of your customers.

End-to-end services include:

Technology selection

When you need complex deployment of cutting-edge technology, leveraging the deep expertise of veteran engineers ensures your ease and speed to market. With our services, you get access to:

- Prototyping
- Technology & server platform selection
- Design validation & testing
- Design for manufacturing
- Regulatory & environmental compliance
- Test automation development
- Pre-NPI planning & support
- Proof of concept deployment & management
- Product deployment & lifecycle planning

Solution delivery

Global complexity can stall any project. With resources across 70 countries Avnet can bring our extensive network to you.
This includes:

- Site surveys
- Field installation
- Remote engineering
- Technical project management

Support services

Across the globe, Avnet can support you with the precise solution that meets your needs, providing consistency, flexibility and scale as your product moves into production. Programs include:

- Product lifecycle management/EOL
- Refurbishment/repair
- Data sanitization
- Component harvesting
- IT Asset Disposition (ITAD)

Warranty management

Your customers will want to safeguard investments and implement replacement parts with warranty programs, parts delivery, and customer support. Choose from:

- Call center support
- Forward stocking locations
- Technician dispatch
- Part dispatch
- Service parts planning
- Reverse logistics/repair

It's easy to deploy technology with end-to-end services

Avnet's end-to-end services are uniquely designed to support your technology, bringing you the exact mix of technical field service, solution delivery and support options. Paired with experienced engineering and global reach, it's just what you need to ensure the consistent, reliable experience your customers expect.

TOP 3 BENEFITS OF USING AVNET'S END-TO-END SERVICES

- Scaled implementation globally
